

James M Dobbie

Games Programmer

Dundee, Scotland · +447964424445 · jamesdobbie.dev@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Game Programmer with three years of experience in developing C++ and C# code for DirectX, Unreal Engine, SFML and Unity Projects. Hardworking and looking to develop further skills.

WORK EXPERIENCE

Game Programmer:

- Created and implemented a 3D Level Editor capable of serialising data to JSON and reading it on PlayStation 5 Hardware for collaborative game project, alongside working on fundamental ECS and Asset loading systems for game.
- Developed a custom player-controlled Space-ship controller in Unreal Engine with full degrees of movement.
- Created and implemented own version of a Behaviour Tree inside Unreal Engine, Using C++ to make a custom AI and player Tank Controller that worked with Unreal Engines path finding system.
- Collaborated with a programmer, two designers and three artists to develop and publish a fast paced First Person Shooter in Unreal Engine 5, Developed core Telekinesis mechanic and AI implementation.
- Developed a hot-swap shader and module system for DirectX, implanting Bloom post processing and Shadow Maps for Directional, Point and Spotlights while separating shaders from their data to make code more re-usable.
- Collaboratively worked on a 2D Unity game for Global Game Jam, primarily developing the item interaction system.
- Created collaboratively a Turn Based space-ship battle game working in Isometric 2D using SFML, implemented a custom AI state tree and A* Algorithm, alongside working on core gameplay.

Games Tester

- Two-week work experience doing games testing at company formerly known as “Testology” in Aldershot England. Learned how to test various applications, websites and entertainment software alongside writing Bug reports and learning Test Plan Production and implementation within project groups.

Volunteering

- Previously taught English to a Ukrainian through Engin programme over 30+ sessions.
- Taught technical skills to elderly people through the Hart foundation in a face-to-face environment, ensuring they left with greater confidence in their knowledge and skills of modern technology.

EDUCATION

Abertay University 2023-present

Computer Games Applications Development

Guildford College 2018-2020

BTEC Level 3 Extended Diploma: Creative Media Production (Distinction*, Distinction*, Distinction)

Farnborough Sixth Form College 2012-2014

AS Levels: (Resistant Materials C, Mathematics B, Physics D, Geography E, General Studies E)

A Levels: (Resistant Materials B, Mathematics C, Physics E, General Studies D)

Skills

Technical Skills: Visual Studio, Unreal Engine 5, Unity

Tools and Software: Git, C++, C#, HLSL, SFML, DirectX 11.
